Reasons for Allowance

1. Claims 1-12 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

The instant application relates to computer implemented method for provisioning broadband service in a point-to-point Ethernet network. The closest prior art of record, Christoffel et al. (US 2002/0136226 A1) and Girard (US 2002/0176404 A1) are in the same field of endeavor, with executable instructions to mediate communications between communication interfaces based on trigger events. However, the cited art, alone or in combination, fails to disclose unique method steps of "sending, by modem, an authentication request after randomly selecting a name, to a broadband remote access server over a point-to-point protocol over Ethernet network; load balancing the request between multiple BSNs (Broadband Service Nodes) and receiving authorization", as in claims 1, 7 and 14. The underlined unique features render the application allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2667
